

Project Ideas

Perfect for figurines, home décor and seasonal items! Sculpey III is the ideal medium to use in creating special projects for every occasion. Sculpey III is easy to condition right from the package and remains soft and pliable until you bake it in your oven. Now you can create and create again until your project is just right. Then bake it in your home oven for a permanent, three-dimensional creation. Sculpey III can be blended easily to create custom colors or for special techniques like marbled or millefiori.

Easy-to-Make Projects

Basic Instructions

- Start with clean hands and work area. Good working surfaces include a glass or metal surface, disposable foil, or wax paper.
- Work light colors before dark colors to avoid staining clay.
- Condition clay by kneading it until it's soft and smooth.
- When connecting two pieces of clay together, press firmly to ensure that they stick together after baking.
- Bake on an oven-proof glass or metal surface at 130° C (275° F for U.S. Consumers) for 15 minutes per 6mm (1/4") of thickness. DO NOT USE MICROWAVE OVEN. DO NOT exceed the recommended temperature or baking time.
- Children using clay should be supervised at all times. All baking should be done by an adult.
- Sculpey III should be used for decorative purposes only and not with food, beverage or smoking materials.

CAUTION Many modeling clays contain ingredients that may stain or damage finished surfaces. Do not place unbaked clay on furniture, flooring, carpeting or fabric. Protect finished surfaces by using unbaked Polyform clay products on a glass or metal surface, or use disposable foil or wax paper beneath your work.

Non-toxic
